#### **Independent Rental Locations**

Please note certain independent rental locations are owned and operated by an independent licensee and not owned or controlled by ABG or any ABG affiliate or subsidiary. These include independent licensees that may use our name (for example, Avis, Budget, Payless, Maggiore and France Cars). This Privacy Notice only applies to the extent one of our independent licensees has shared your

personal information with us as described in the [Data Received from Third Parties](#) section or where we act as joint controllers with an independent licensee as described below. Otherwise, this Privacy Notice does not apply to processing of your personal information by an independent licensee.

For certain processing of your personal information, in particular when both Avis and the independent licensee are processing your personal data for the purposes of bookings and rentals utilising the ABG central booking system, then both parties will act as joint controllers. This Privacy Notice sets out your personal data which is processed even in these circumstances. Where we act as joint controllers, ABG and our independent licensees are responsible for complying with their own obligations under applicable data protection law, including responding to any requests to exercise data subject rights under applicable data protection law.

### PERSONAL INFORMATION WE COLLECT AND HOW WE COLLECT IT

#### RENTING A VEHICLE

When you make a reservation or rent a vehicle with us we collect the following personal information:

- name;
- email address;
- home address;
- employer details and business address (if you are a member of a corporate program);
- telephone number;
- date of birth;
- gender;
- payment information such as your credit or debit card details (security code is obtained for transaction only – we do not keep it);
- tax number (if specifically requested);
- information from driver's license and/or other government-issued identification, including if you are an additional driver for the specific rental;
- information from another form of identification documentation such as a passport or national identity card if your driver's license does not include a photo or is not recognizable as you and/or proof of address such as a utility bill. We will inform you at the time if we will retain the information that includes your photo ID in these circumstances;
- special discount codes, partner member numbers, association memberships, corporate rewards programs (if you request discounts, special privileges, and points programs);
- special requests and preferences, including:
  - your preferences regarding optional extras such as damage waivers and other protections;
  - where a delivery or collection service is available, the address where we will drop off or pick-up the vehicle and any optional extras you requested;
- where and when you rented the vehicle, where and when you returned the vehicle, insurance preferences, fuel consumption, mileage, accident history and other personal information related to the vehicle and your use of it;
- where you inform us that you have a medical disability or other health-related requirements that require an adapted vehicle or other driver aid we will use that personal information in order to provide you with the service you requested and where you have given your explicit consent to us using that information;
- ABG maintains a Do Not Rent list of customers who present risks to our business and/or personnel and who will be prevented from making a rental with us as a result of those risks. The personal information ABG processes to maintain this list includes contact and other personal details including the reasons why the individual has been included on the Do Not Rent list as further detailed in the [DO NOT RENT LIST](#) section below;
- when returning a vehicle following a rental we may ask you for a fuel receipt and we may retain a copy of that receipt. This fuel receipt may include credit card information, date and location of purchase and is required to confirm that the vehicle has been refueled in accordance with our rental agreement with you;
- our rental vehicles have embedded technology or external devices fitted that track the vehicle and collect information about the vehicle's location, technical information about the operation of the vehicle, the vehicle's fuel readings, and the vehicle mileage readings. To learn about Connected Car Data we collect, see the [Connected Cars section](#); and

- in some locations we may be required to collect specific categories of personal data relating to you and your rental so that this can be provided to law enforcement (such as police) where required by applicable law. This may include the personal data set out above as well as additional personal data as required by law.

## **TRAFFIC AND MOTORING OFFENCES**

We will collect personal information about any speeding, parking, toll or other traffic-related fines that you incur or any traffic offenses that you commit during your rental where these are provided to us by any law enforcement agency, parking authority or toll authority.

## **ACCIDENTS, MECHANICAL FAILURES, AND VEHICLE DAMAGE OR THEFT**

If you have an accident, or suffer any loss, theft or damage to the vehicle during your rental or suffer any mechanical failure, we will collect information regarding such incident including your report of the incident and any police or other third-party reports including details of those involved, together with the nature of any personal injuries and/or damage to the vehicle and optional extras.

## **CONTACTING US**

When you call us, we may record or monitor the call for quality control, training or similar purposes. We will advise you of this recording or monitoring during the call.

When you contact us by email, text or via social media we will keep a record of your name, contact details and the contents of your messages, queries, feedback or complaints.

## **DRIVING LICENSE VERIFICATION**

We may offer you the option to verify your driving license (or other identification documents) online or through our App via our third party verification provider which may enable you to bypass the counter verification process at our rental stations.

If you proceed with this verification online or through our App we will collect an image of your driving license and selfie in order to complete verification.

The processing of your selfie requires biometric verification and will only be completed where you have provided your explicit consent as biometric data is considered a special category of personal data where processed for identification purposes.

Online verification is optional and you can still complete the digital check-in process without completing online verification. You will still need to register your details and verify your driving license / ID prior to your rental but this can be completed at our rental station when you collect your rental vehicle. However, a failure to complete online verification will mean that you are unable to bypass the counter at our rental stations or rent from unstaffed locations.

Should we offer you the option to create an account with us, this will enable us to retain your verification status so that you can use this verification status for future rentals with us without having to complete the online verification process for each future rental. However, we will still require you to re-verify your driving license and identity at regular intervals and where details require updating – such as where your driving license has expired.

Online verification may also involve the receipt of information from third party fraud check and identity document database check providers.

## CONNECTED CARS

### ***What Are Connected Cars and Connected Car Data?***

A connected car is a vehicle equipped with a telematic system or a separate on-board device that is capable of the collection of data about the vehicle and its use.

The information which is collected by connected cars is explained in the table below and includes information about the vehicle's condition; operation and diagnostic data; information on mileage and fuel consumption; and GPS location information (collectively, "**Connected Car Data**").

Not all of our rental vehicles are connected vehicles collecting Connected Car Data. Please speak to a member of our team or contact your Rental Station Manager if you have any questions regarding whether or not a vehicle is collecting Connected Car Data.

While you are using one of our connected cars, all Connected Car Data that is directly or indirectly linked to you is your personal information (collectively, "**Personal Connected Car Data**") including the location of the vehicle, mileage and fuel consumption during your rental. Connected Car Data from our vehicles that cannot be linked to a specific rental or that is collected outside of the period of a rental is not personal information.

***How is Connected Car Data collected?***

Personal Connected Car Data about you is collected:

- a. during your rental period of a connected car (please note that information is also collected when that connected car is not switched on or being used by anyone); and
- b. when you connect a device to the infotainment system of a connected car. **To prevent the next driver from accessing your Personal Connected Car Data, please always unpair your device and delete any personal information that is stored on the vehicle’s infotainment system upon returning the vehicle.**

The Connected Car Data collected during your rental period is either collected directly by the vehicle manufacturers from the vehicle's internal communication module ("**OEM Devices**") which is then made available to ABG, or is collected from separate devices installed into vehicles by, or on behalf of, ABG ("**Vehicle Recovery Devices**") which are used to attempt to locate and recover our connected car when it is not returned.

The GPS location of the connected car is collected periodically during the period of your rental from the OEM Device or Vehicle Recovery Device.

***The Purposes for Collecting Personal Connected Car Data and Legal Basis for Processing***

The following table describes the Personal Connected Car Data we collect, the purposes for which we collect it and the legal basis which we rely on to process this data. If we need to use Personal Connected Car Data for any permitted purposes not listed in the table below, we will notify you and explain the legal basis for processing.

In addition to the processing outlined below, all of the Personal Connected Car Data described below will also be processed or provided to law enforcement bodies or competent regulatory authorities or agencies where required by law or where it is necessary for dealing with a reasonable request by any such body. The legal basis for this processing is ABG's compliance with a legal requirement (GDPR article 6(1)(c)) or legitimate interests (GDPR article 6(1)(f)). See section "*When do we have legitimate interests?*" for more information.

**Who within ABG has access to Personal Connected Car Data**

A limited number of members of our Connected Car Services and Information Technology teams may access Connected Car Data. This may also occur when access is necessary for

service repair and maintenance purposes, as well as for analysis of the performance of our systems. When processing the Personal Connected Car Data for these purposes the teams will not have the ability to link the relevant Connected Car Data back to the related renter.

### ***When do we have legitimate interests?***

We have set out below details of our assessment (and balancing tests between our legitimate interests and the data subjects' rights and interests) when we rely on legitimate interests including the safeguards and limitations we apply to protect your personal information. In relation to all Personal Connected Car Data we process based on our legitimate interests, we apply the following safeguards:

- **Policies and procedures:** Our internal policies and procedures apply to how we collect and use your data including ensuring that we use your data only for specific purposes;
- **Limited internal access:** Only a limited number of individuals with ABG can access Connected Car Data following appropriate authorisations and for limited purposes; and
- **Security.** We ensure suitable security is in place to protect Personal Connected Car Data including access controls, user authentication and audits as well as enterprise wide security controls applied to our systems to ensure the security of Personal Data.

### ***GPS location data***

As set out in the table above, we will process GPS location data of connected cars based on our legitimate interests in relation to: (a) recovery of vehicles in the event of theft or suspected theft or loss; (b) claims and litigation where a connected car is potentially involved in an accident; (c) check-in and check-out procedures and to better manage the availability and distribution of our fleet including by allowing us to generate inventories of which vehicles are at our rental locations.

ABG recognises that data relating to individual's location can be intrusive for individual's privacy. However, ABG has carried out an assessment to ensure that limitations and protections are in place to ensure that any impact is proportionate to the purposes for which ABG will use location data. These limitations and protection are:

- **Operational purposes:** Any use of the GPS location data is for operational purposes to improve efficiency or protect ABG's assets and legal rights. It is not used to obtain any insight into the individuals or used for any profiling or advertising purposes;
- **Limited functionality:** GPS devices do not have any video or audio recording capabilities;
- **Periodic location recording:** In usual circumstances GPS devices only transmit vehicle location data to ABG periodically meaning there is no continuous tracking of connected car location. Only where an appropriate trigger event occurs that indicates potential theft or loss of a vehicle will more frequent tracking of location take place; and

- **Geofence technology:** This is limited to a confirmation that a connected car is onsite or offsite at one of our vehicle rental locations and does not track the GPS location of the vehicle outside of our rental locations.

### ***Fuel readings, diagnostic / maintenance information and mileage readings***

We will process: (a) fuel readings to better understand fuel consumption rates and driving efficiencies across our fleet as well as to display this for your rental on our App; (b) Diagnostic / maintenance information to anticipate and, where possible, prevent breakdowns of the connected car; and (c) mileage readings to understand and manage the mileage of connected cars across our fleet; and (d) mileage readings to display mileage for your rental on our App.

We have a valid legal basis for processing (our legitimate interest as set out above), that processing is necessary to achieve this purpose and to ensure that your interests are protected and any impact of the processing on you are minimised and proportionate to the purposes of processing. These safeguards include:

- **Nature of the Personal Connected Car Data:** We have limited the data used for these purposes to information that is not inherently private or sensitive. For example, diagnostic information such as warning lights and tyre pressure do not provide any insight into the renters journey or activities during the rental.
- **Limited use:** We limit use of this personal data to the purposes set out above which relate primarily to understanding, maintaining and optimising the operation of our fleet. We also present fuel and mileage readings on our App to assist you in understanding this information during and after your rental. We do not use this information for analytics or profiling in relation to specific customers or to make decisions about individual customers. Please see the table above for details of our processing of fuel readings and mileage in connection with the performance of your rental agreement.

### ***Information collected by the infotainment system***

We will process information when you connect your device to the infotainment system (including details of your contacts, call history, and your music preferences) based on our legitimate interests in order to enable the infotainment system to function.

We understand that any processing of information from a personal device is more intrusive to your privacy. We therefore ensure that the impact of the processing is proportionate to our proposed use of the infotainment system data and that suitable safeguards are in place. These include:

- **Customer choice:** Customers are not required to connect a device to the infotainment system. This information is only collected if you choose to sync your device to the infotainment system.
- **Limited data received by ABG:** Customers can delete their information from the infotainment system at the end of their rental. If this information is deleted, ABG does not receive this information.
- **Restricted use:** Infotainment information is only used to enable functionality of the infotainment system during a rental. ABG does not use this information for any other

purposes and does not link this information to an individual's rental history or this information to make decision about an individual.

***Personal Connected Car Data provided to law enforcement bodies or competent regulatory authorities or agencies***

Personal Connected Car Data will also be provided to law enforcement bodies or competent regulatory authorities or agencies where it is necessary for dealing with a legitimate request by any such body based on the legitimate interests of ABG and / or the requestor. We understand that disclosures of your Personal Data to law enforcement or other competent authorities and agencies can be intrusive to your privacy. We therefore assess each request individually to ensure that any disclosure is reasonable and proportionate and that suitable safeguards are in place. This assessment and safeguards will depend on the nature of each request but will include compliance with our internal policies and procedures relating to how we share Personal Connected Car Data in response to such requests.

Please contact us if you would like further information on the balancing tests discussed above.

***Your rights in relation to Personal Connected Car Data***

For further details of your rights in relation to Personal Connected Car Data please see the [Your Rights and Choices](#) section.

***What other terms apply when you use connected car features?***

Use of features in connected cars is subject to the terms and conditions posted by the vehicle manufacturer and/or the technology provider, which may include system and service limitations, warranty exclusions, limitations of liability, wireless service provider terms and user responsibilities. Some or all of these features are turned on at all times, even when other services or other media in the vehicle are turned off.

Vehicle manufacturers may also collect Connected Car Data from our vehicles pursuant to their privacy policy and share the Connected Car Data with us. You can review their privacy policy and other terms and conditions related to Connected Car Data on the applicable vehicle manufacturer's website. Details on the features in your rental vehicle are set out in the "Vehicle Details" section of the Rental Agreement. We cannot guarantee that a vehicle without these features will be available at your time of rental.

In these circumstances, the manufacturer may also be a data controller of your Personal Connected Car Data. Please note, that Connected Car Data will first be received by the manufacturer of the connected car prior to it being received by us. We encourage you to read the privacy notices relating to these services to understand what Personal Connected Car Data is being collected and the purposes for which it is being collected. If you are unsure whether your connected car has such services, please speak to a member of our team or contact your Rental Station Manager.

***How long do we retain Personal Connected Car Data?***

We only retain Personal Connected Car Data for the amount of time necessary to perform the purposes for which it was collected. This means the following retention periods apply to the

Personal Connected Car Data unless there is a longer retention period to comply with an applicable legal or regulatory duty:

Category of personal information	Purpose of Processing	How long we will keep this personal information

### ***Removing information from infotainment system***

If you choose to sync a mobile device to the connected car (using Bluetooth, USB or otherwise) **please ensure that you take the necessary steps to remove your information from the system when you return the connected car at the end of your rental period. If you do not do this, your information may be retained in the system.** If you are unsure whether you have removed all of your information, please speak to a member of the team or your Rental Station Manager.
